

Amendments to the Specification are as follows:

Please amend the paragraph beginning on page 9, line 22 and ending on page 10, line 2 as follows:

(Currently Amended) The motor 107 is fixed to a base 115 with a bracket 113 therebetween. The movement conversion mechanism 109 is arranged in a space formed between the base 115 and the bracket 113. The base 115 is arranged adjustably in position relative to the base frame according to need. The motor ~~37~~107, such as a DC motor and a stepping motor, has a rotation precision capable of finely moving the magnetic head (slider) in the diametric direction (X-direction) of the magnetic disc 103 so as to trace a predetermined track.
